Birla Viscose TM

FOR A SUSTAINABLY FASHIONABLE FUTURE

Birla Viscose

Birla Viscose is a nature based fibre that embodies the essence of sustainability. This fibre is 100% plant based, made from wood pulp, sourced from sustainably managed forests and manufactured in plants that adhere to highest global norms on environmental responsibility.

Benefits

100% Plant Origin

Soft Feel

Skin Friendly

Moisture Absorption

Breathability

Longlasting Shine

Lightweight

Unique Drape & Fluidity

Birla Viscose EcoSoft

Birla Viscose EcoSoft is a new variant of viscose, made exclusively from bamboo pulp. Bamboo being one of the fastest growing species, is widely considered less resource intensive to cultivate versus other natural fibres and hence increasingly seen as an eco-friendly solution for textile needs.

EcoSoft fibres are an advancement over generic viscose fibres, offering higher durability & better moisture management. The resultant fabrics allow for high breathability, aiding in thermo-regulation. They are also characterized by soft textures and are light in weight.

Birla Viscose EcoSoft is embedded with a molecular tracer which allows the value chain to trace the supply chain journey through our GreenTrack platform.

Benefits

Moisture Management
providing comfort

Breathable

Soft & Silky

Velvety Drape

Global Recognition

Our commitment to the environment and to our customers has always been strong. Today, the alignment of values between them is what drives us to bring new and better products to our industry. With our global presence throughout the entire value chain- from plantation to pulp, to fibre and to fashion - we, through our business development platforms, facilitate our value chain partners (spinners, weavers, processors and garmentors) to build business bridges across geographies.
